

ULV COLD FOGGER E2

STRONG-INJECTION

Capable of atomizing water or other chemicals in small sizes.

Strong airstream ejects microscopic particle sizes between 5 and 50 microns.

Well suited for applying disinfectants, deodorizers, insecticides, etc.

Product Specifications:

- Motor Output: 1,250 W
- Capacity of Chemical: 3l
- Injection Distance: 5-10m
- Particle Size: 5-50 micron
- Power Source: 110V/220V
- Size: 160 x 550 x 250 mm (net)
- Weight: 3.0kg
- Cable Length: 5m

MAIN CHARACTERISTICS AND FEATURES:

- Strong injection and ultra-low volume spraying function ensures the penetration and diffusion of the solution to fine areas.
- It can be used with water- and oil-based solutions
- Can spray different chemicals, such as insecticide, germicide, freshener, antibiotics. Very easy to use and efficient due to its powerful spray.
- Can cover 100 square meters in less than two minutes.

ADDITIONAL FEATURES:

- Speed control allows user to change the spraying distance and droplet size.
- Control the amount of chemical.
- Air vent valve installed on chemical tank.
- Chemical tank easily replaceable, emptied and washable.

APPLICATIONS:

The E2 ULV cold fogger can be used in places such as aircraft, public transportations, public areas, hospitals, schools, commercial facilities, private homes, etc.

With this device users work 6-7 times faster than with a traditional sprayer, taking into account savings on this and chemical means, economic benefits to traditional sprayers. The ULV has a slider to adjust the particle size between 5 and 50 microns. It also has a slider to control the desired power.
